

## 21' TRAILABLE PERFORMANCE CRUISER Huzar 21 SPECIFICATION GENERAL DESCRIPTION

### CONSTRUCTION

The Huzar 21 is designed and constructed in accordance with the European Recreational Craft Directive 94/25/EC and the amendment Directive 2003/44/EC.

It meets the harmonized EN ISO standards or draft standards related to the above Directive. She fulfills category C requirements.

### HULL AND DECK

Hand laid laminate consisting of alternate plies of fiberglass mat and fiberglass woven roving. NPG gelcoat with solid laminate barrier layer impregnated with isophthalic resin ensuring osmosis resistance of the hull.

Hull and deck are sandwich construction with PVC core.

Moulded anti-slip areas. Anti-slip 3M tapes in all areas requiring good adhesion.

White hull with blue colour stripes.

Options:

Blue hull with white colour stripe.

Epoxy antiosmosis primer with antifouling coating.

### STRUCTURAL FRAMES

A moulded hull liner / tray defines the interior layout and stiffens the hull. The overhead liner finishes the underside of the deck moulding. The liners are bonded to the hull and deck with the structural adhesive providing the exceptionally rigid structure.

### CENTRE BOARD – LIFT KEEL

Laminated keel box placed under the cockpit, thus not obstructing the cabin space.

Weight of the keel around 230 kg. Lifting winch (type PFAFF – 1120 kg) capacity for easy lifting of the keel.

Optional blocking of the keel in lower position.

### RUDDER AND STEERING

Lift fin rudder. Aluminum or stainless steel yoke. GRP enclosed foam filled rudder fin construction Aluminum tiller with teak grip. Optional tiller extension.

### MAST & RIGGING

Rotating racing mast. Boom with standard rigid boom vang

Options:

Mast yoke and gate assembly with tackle for mast lying.

Tricolour / anchor LED light for energy saving.

Running rigging controlled from the cockpit. Stainless steel single strand standing rigging. Running rigging internal halyards - 1 jib halyard, 1 main halyard, 1 topping lift. Deck organizers for halyards.

### SAILS

Standard fully battened bi-radial main. Bi-radial jib.

Options:

Lazy Jack and sailcover, tri-radial genoa, gennaker with gear. Sail bags

### DECK FITTINGS

Stainless steel pulpit with teak step, pushpits (optional navigation lights can be fitted).

Chain locker with the moulded seat for the anchor.

6 stainless steel 480 mm stanchions with lines.

Teak handrails on the coachroof top.

Four Aluminum mooring cleats.

Two size 8 halyard winches.

Two triple halyard stopper.

Two size 16 self tailing sheet winches.

Two jib tracks 1000mm with Pfeiffer cars.

Aluminum pedestal with rotating main sheet tackle.

Two generous cockpit lockers.

Stainless steel folding swim ladder.

Options:

## 21' TRAILABLE PERFORMANCE CRUISER Huzar 21 SPECIFICATION GENERAL DESCRIPTION

### NAVIGATION INSTRUMENTS

Compass on sliding hatch garage.  
Optional multifunction instrument on bulkhead  
– speed, distance, depth (Bi- data).

### PLUMBING AND ELECTRICITY

Manual bilge pump 45 l/min.  
70 Ah domestic battery  
Switch panel with 6 automatic CBs

Optional  
Battery voltage indicator and 12V DC lighter  
socket on electrical panel.  
Shore power connection, battery charger.
